

U.S. DEPARTMENT OF THE INTERIOR
Certification of Position Approval
for Retirement
Under 5 USC 8336(c) and 8412(d)

[x] Approved under the Civil Service Retirement System, 5 USC 8336(c)

[x] Approved under the Federal Employees Retirement System, 5 USC 8412(d)

Category of Coverage: Secondary/Administrative (Firefighter)

Bureau: Any DOI Bureau may use this PD and must use this DOI Standard PD Number*

Classification Title: Fire Management Specialist (Prescribed Fire/Fuels)

Organization Title: _____

DOI Standard PD Number: DOI022* Series and Grade: GS-0401-11

*This number should be entered in the employee's master records (FPPS) as last six spaces of Position Allocation Number.

RECOMMENDATION FOR COVERAGE: Secondary-Administrative Firefighter coverage is recommended under both CSRS and FERS.

This DOI Standard Position Description (SPD) is for a key fire management position located in a fire management organization within any Bureau of the Department of the Interior (DOI). **The FIRE MANAGEMENT SPECIALIST (PRESCRIBED FIRE/FUELS) requirements contained in the Interagency Fire Program Management Standards and Guide (IFPM) must be used in conjunction with this PD.** These standards include minimum qualifications, training requirements, competencies, and key performance elements.

The purpose of this position is to plan, develop, and implement the fire use and fuels management program. The incumbent has program responsibility for prescribed fire, fuels management, smoke management, and wildland fire use. The incumbent provides professional advice and assistance to meet resource management objectives with prescribed fire and/or wildland fire use. The incumbent must interpret and analyze environmental influences and fire behavior, make judgments, and adjust tactics as conditions change. **Prior wildland firefighting experience on the fireline, as gained by substantial service in a primary/rigorous firefighter position, or equivalent experience outside the Federal government is a MANDATORY PREREQUISITE to qualify for this position.**

INTRODUCTION:

This is a standard wildland fire management position description intended for use in the Department of the Interior (DOI). The incumbent serves in a key fire management position in a field fire management organization as a Fire Management Specialist (Prescribed Fire and Fuels). This position is located in a unit with a moderate to high fire management program complexity level.

The incumbent has program responsibility for prescribed fire, fuels management, smoke management, and wildland fire use. The incumbent provides professional advice and assistance to meet resource management objectives with prescribed fire and/or wildland fire use.

This is an arduous position and subject to medical screening and physical fitness testing.

The qualification requirements specified in the Interagency Fire Program Management (IFPM) Qualifications Standards and Guide must be met prior to entrance into this position.

Prior wildland firefighting experience on the fireline is a mandatory requirement.

This position requires a valid state driver's license.

MAJOR DUTIES:**Program Management (50%)**

Provides professional expertise in the development and implementation of multiple resource objectives. Develops fuels treatment alternatives to support management decisions while adhering to applicable laws, regulations, policies, and guidelines. Evaluates individual fuels treatments as well as the effectiveness of the overall program and makes recommendations for improvement.

Responsible for the smoke management program to ensure compliance with state air quality standards. Coordinates with federal, state, and local government air quality officials in their development of operational procedures and reporting requirements.

Performs fiscal analysis, formulates the annual fuels management budget, and maintains a system of accounts to track program expenditures. This includes managing the budget from out-year planning to year-end closure.

Coordinates with the next higher organizational level, other agencies, cooperators, and stakeholders to develop interagency fuels strategies. Represents the organization in multi-agency fuels management activities.

Maintains awareness of technological developments in wildland fire science and related disciplines. Collects information through a variety of methods, including field surveys, computer modeling, and specific literature searches. Stays abreast of state-of-the-art computer modeling software and scientific methods to support fire use, air quality, and fuel treatment planning and applications.

Coordinates multi-disciplinary field studies related to fuels management program issues to determine effectiveness of treatments. Coordinates and provides transfer of findings to the appropriate personnel.

Planning (30%)

Serves as a member of an interdisciplinary team planning, developing, and implementing land management plans, compliance documents, and agreements. Provides input and recommends strategies for fuels and fire management.

Provides assistance to other resource program managers in the design of fuels management prescriptions and implementation plans. Provides information on fuels management methods to enhance, restore and protect ecosystems.

Participates in the development, review, and modification of the fire management plan. Develops, reviews and monitors fuels management plans. Works closely with other resource specialists to integrate vegetation management project designs in fuels program direction.

Reviews environmental documents, prescribed fire plans, and wildland fire use plans of other agencies and stakeholders which will affect the unit.

Prepares wildland fire risk assessments incorporating wildland/urban interface considerations into all agreements, operating plans, and land and fire management plans, to ensure that all interface areas are covered and state and local responsibilities are apportioned appropriately.

Participates in the development of cooperative agreements to facilitate multi-agency projects.

Operations and Safety (20%)

Implements and administers prescribed fire activities, wildland fire use, and fuels management activities to ensure targets are achieved, management objectives are met and mitigation measures are adequate. Monitors fire behavior, evaluates fire effects, identifies potential problems and takes appropriate action.

Designs and implements fuels management surveys to document presence, amount, and types of hazardous fuels. Utilizes the results of the surveys to prioritize prescribed fire and fuels management projects.

Ensures own and other's welfare and safety in all aspects of project implementation. Identifies training needs and participates in prescribed fire and fuels management, and wildland fire and safety training in the techniques, practices, and methods of fire suppression.

Participates in preparedness reviews, proficiency checks and drills, safety sessions, and after action reviews.

May serve as a Contracting Officer's Representative (COR) on fuels management contracts and may be responsible for the preparation of contract specifications and performance measures.

Supports wildland fire suppression activities.

FACTORS:

1. Knowledge Required by the Position

(Level 1-7, 1250 points)

Professional knowledge of natural resource management, fire ecology, fire behavior, and fire management theories, concepts, principles, and standards in a wildland fire environment.

Knowledge of the policies, techniques and practices of wildland firefighting obtained through substantial service as a primary firefighter of the Federal government or in a similar firefighting position outside the Federal government. This is a mandatory requirement of this position.

Fundamental knowledge of related fields of science (e.g., wildlife management, botany, hydrology, geology, archeology).

Comprehensive knowledge of the effects of prescribed fire and fire use on natural and cultural resources to prepare complex fuels management plans.

Knowledge of environmental laws, regulations, and policies including the National Environmental Policy Act (NEPA), Clean Air Act, Threatened and Endangered Species Act, and the Wilderness Act sufficient to produce environmentally sound and defensible documents.

Knowledge of accepted wildland fire safety practices and procedures.

Knowledge of computer applications and software for a variety of fuels management uses.

Knowledge of budgeting policy, procedures and techniques sufficient to develop program budgets and annual work plans.

Knowledge of contracting procedures and ability to serve as a Contracting Officer's Representative (COR).

Ability to interact with individuals and special interest groups with diverse and potentially conflicting viewpoints regarding natural and cultural resource management priorities.

Skill in oral and written communication sufficient to prepare reports, present training, and coordinate work efforts.

2. Supervisory Controls

(Level 2-4, 450 points)

Supervisor gives assignments in terms of broad areas of responsibility, program emphasis, and key management concerns. The employee and the supervisor confer on priorities and deadlines for program accomplishment. The employee independently plans and coordinates with others in determining methods of accomplishment.

The incumbent plans and carries out major tasks in accordance with priorities and deadlines provided and performs assignments without specific instructions in accordance with policy and accepted practices. The employee keeps the supervisor informed of progress, significant concerns, and controversial issues. Completed staff work is required.

Work is reviewed for adequacy in meeting objectives and priorities and for compliance with laws, regulations, and guidelines.

3. Guidelines

(Level 3-3, 275 points)

Guidelines are found in interagency manuals, agency specific manuals, handbooks, directives and policy statements. Many guidelines provide only limited general directions and require the development of additional procedures to implement their intent.

The incumbent has broad latitude for independent action due to the wide range of variables under which the work is accomplished. The incumbent relies on experience and uses judgment in adapting techniques, methods or established practices to complete assignments and achieve objectives.

4. Complexity

(Level 4-4, 225 points)

The work entails a variety of complex administrative and technical prescribed fire, wildland fire use, and fuels management support functions, each involving numerous procedures and operating requirements. The incumbent must interpret and analyze environmental influences and fire behavior, make judgements, and adjust tactics as conditions change. Complex variables such as weather, fuels (type and condition), topography, fire behavior, management objectives and resource protection concerns, strategies and tactics, resource availability and capability, employee and public safety,

must be considered by the incumbent in making critical decisions under pressure. Adding an additional layer to the complexity are factors such as different types of treatment; social, political, and economic issues; higher complexity fuels treatment projects; resource and property values at risk; smoke management requirements; multiple jurisdictions, frequent use of aviation operations or support; and intra- inter-agency coordination requirements.

The multiple variables, conflicts in resource management objectives, and environmental constraints require that the incumbent evaluate a considerable amount of data in formulating the appropriate strategy into an effective prescribed fire/fuels management program.

Due to the nature of fire management work, the incumbent may have to react quickly and perform multiple, unrelated simultaneous assignments along with other competing demands in the work environment.

5. Scope and Effect

(Level 5-3, 150 points)

The purpose of the position is to plan, develop, and implement the fire use and fuels management program for a unit with a moderate to high fire management program complexity level or serves in support of a higher level position in a high complexity program.

The work directly affects the design and execution of projects, the accuracy and acceptability of findings and recommendations, and provides an essential basis for management conclusions and plans.

6. Personal Contacts

(Level 6-2, 25 points)

Primary contacts are with fire and other resource personnel and managers within the organization. Additionally, contacts are with State, Tribal and local governments or other Federal agencies, special interest groups and the general public. Other significant contacts may include contractors, news media, local community leaders, and cooperators.

7. Purpose of Contacts

(Level 7-2, 50 points)

Contacts are necessary for planning, implementation and coordination of the fuels management program. Contacts are also made to coordinate activities, ensure compliance with established safe practices, solve operational problems, resolve conflicts, and conduct training.

8. Physical Requirements

(Level 8-3, 50 points)

The work is normally sedentary. However, field work is evaluated as arduous and the duties include demands for strenuous activities in emergencies under adverse

environmental conditions and over extended periods of time.

Incumbent is subject to medical examination and must pass the work capacity test for arduous positions.

9. Work Environment

(Level 9-3, 50 points)

Office conditions require long periods of sitting, working with computers and general lifting, bending and reaching. Field conditions involve the employee being exposed to noise, dust, heat, weather, aircraft turbulence and the hazards of firefighting such as heat, smoke, and fire behavior. Protective clothing and equipment is required in hazardous environments.

EVALUATION STATEMENT

<u>Recommended Classification</u>	Fire Management Specialist (Prescribed Fire and Fuels), GS-401-11
<u>Organizational Location:</u>	Department of the Interior, Bureau of Indian Affairs, U.S. Fish and Wildlife Service, National Park Service, and Bureau of Land Management
<u>References:</u>	Handbook of Occupational Groups and Families, August 2001. Part I of the Forestry Series, GS-460, Jun 1965 TS-57, Dec 1979, TS-39

Background: The incumbent serves in a key fire management position in a field fire management organization as a Fire Management Specialist (Prescribed Fire and Fuels). This position is located in a unit with a moderate to high fire management program complexity level.

The incumbent has program responsibility for prescribed fire, fuels management, smoke management, and wildland fire use. The incumbent provides professional advice and assistance to meet resource management objectives with prescribed fire and/or wildland fire use.

Determination of Series and Title: The General Biological Science Series, GS-401 includes positions that involve professional work in biology, agriculture, or related natural resource management when there is no other more appropriate series. Thus included in this series are positions that involve: (1) a combination of several professional fields with none predominant; or (2) a specialized professional field not readily identified with other existing series. This position is a specialized professional field (Wildland Fire Management) not readily identified with other existing series.

In accordance with agency practice, this position is titled **Fire Management Specialist**.

Because this position requires specialized knowledge of prescribed fire and fuels, the parenthetical title of **(Prescribed Fire and Fuels)** is appropriate and is in line with agency practice.

Determination of Grade: Since no grading criteria is published for occupations placed into the General Biological Science Series, GS-401, the grading criteria found in part I of the Forestry Series, GS-460, (Jun 1965 TS-57, Dec 1979, TS-39) will be used.

FACTOR EVALUATION SYSTEM POINTS RATINGS		
Evaluation Factors	Points	Level
1. Knowledge Required by the Position	1250	1-7
2. Supervisory Controls	450	2-4
3. Guidelines	275	3-3
4. Complexity	225	4-4
5. Scope and Effect	150	5-3
6. Personal Contacts	25	6-2
7. Purpose of Contacts	50	7-2
8. Physical Demands	50	8-3
9. Work Environment	50	9-3
Total Points	2525	
Grade Conversion Range (2355-2750)	GS-11	

Conclusion: The proper title, series, and grade are **Fire Management Specialist (Prescribed Fire and Fuels), GS-401-11.**
